About me: I'm a web developer with a demonstrated history of working in the Information Technology & Services industry for more than 6 years. I love working on projects, converting ideas and UI's to functional web applications and enjoy doing the front-end part because of my skills in user interface design. I create websites and web apps using javascript frameworks. I have skills in Software Engineering, Front-end web development, React JS, UI Design, Graphic Design, Photography, Translation, Blogging, Software Reviewing, and Management. I'm fast learner with, strong media and communication professional with an engineering degree focused in mechanical engineering from University of Mosul.

● PROJECTS

06/02/2021 – 13/02/2021
Weather web app (React JS)

Provide detailed weather forecasts over a 6 day period updated each day for more than 2000 cities in the world.
Used libraries and dependencies:
React JS, Chart.js, Fontawesome, Bootstrap ,Ajax
Live Demo: https://weather-app-othman.netlify.app
Code Repo: https://github.com/Othmanosx/weather_app_js

28/01/2021 – CURRENT
Mood Analyzer (Angular)

A web app that analyzes human faces and detects changes with emotions depending on the facial expression of image.
Technologies: Angular, TypeScript, Firebase (for deployment)
Code Repo: https://github.com/Othmanosx/MoodApp (in development)

28/01/2021 – 05/02/2021
Hangman Game (ReactJS)

Hangman is a word guessing game which I developed using ReactJS Javascript framework in which the user guesses the word generated randomly by the game from an API.
Live Demo: https://hangman-sand-team.netlify.app/
Code Repo: https://github.com/Othmanosx/hangman_react_js

02/2021 – CURRENT
FindYours (in development)

The idea of the project is to help people find their missing stuff, will let people post the things they lost and let people post the things they found, every post will contain the info a user may need to contact the person. Every province will have its own section.
Technologies and dependencies
React JS, Material UI CSS Framework, Firebase, Redux, Jest testing, Prettier, Eslint.
Repo: https://github.com/murtaja1/find_yours
